01 POSITIONING

Most marketers buy tools. I build the systems behind them.

Seven years ranking sites on Google showed me where real demand exists — and how to capture it at scale. I combine Technical SEO, AEO, and GEO with automation and lightweight engineering to turn search intent into structured, revenue-generating pipelines.

I design the content architecture, build the data flow that feeds it, and deploy conversion-focused web experiences — including 3D / WebGL interfaces — to maximise engagement and retention.

A hybrid operator across search, systems, and execution. One hire. End-to-end growth infrastructure.
