

MURADUZZAMAN

Growth Engineer — Marketer Who Ships Software

H: 52, Block D, Road 01, Aftabnagar, Dhaka, Bangladesh
+8801310429518 · +8801917286515 · me@mjrifat.com

POSITIONING

Most marketers use tools. I build the systems behind them.

Six years of ranking sites on Google revealed where real demand exists — and how to capture it at scale. I combine Technical SEO, AEO, and GEO with automation and lightweight engineering to turn search intent into structured, revenue-generating pipelines.

I design the content architecture, build the data flow that feeds it, and deploy conversion-focused web experiences — including interactive 3D / WebGL interfaces — to maximize engagement and retention.

A hybrid operator across search, systems, and execution.

One hire. End-to-end growth infrastructure.

PROOF OF WORK — SYSTEMS & PRODUCTS

ProWorkSpace — AI SaaS Chrome Extension

End-to-end SaaS for freelancers: Chrome extension, marketing site, Stripe billing, and admin panel. Built, launched, and monetized with a clear acquisition → conversion flow.

Stack: *Chrome Extensions API · JavaScript · Node.js · Stripe · Admin dashboard*

Forex Lead Finder — Multi-Platform Scraping Engine

Production-grade Python system aggregating data from Reddit, TradingView, BabyPips, ForexFactory, and LinkedIn. Weighted keyword scoring, centralized SQLite storage, Flask UI, API layer, and scheduled automation. Outputs structured, sales-ready leads.

Stack: *Python · Flask · Playwright · APScheduler · SQLite · BeautifulSoup*

AYVA — Shopify Dawn Fork (Custom Storefront)

Minimalist, high-performance ecommerce build with fully customized Liquid sections. Migrated product catalog and removed third-party dependencies for speed and control.

Stack: *Liquid · Shopify Dawn · Theme architecture*

Email Outreach Engine — Lead Acquisition System

Automated pipeline extracting emails from social platforms and executing controlled outreach with deliverability-safe rate limits. Designed for scalable cold acquisition.

Stack: *Playwright · Automation logic · Rate-limited sending system*

Google Maps Lead Extractor — Local Data Pipeline

CLI-based extraction tool for local business leads using structured queries and pagination. Clean export pipeline for sales usage.

Stack: *Python · SerpAPI · CSV pipelines*

BrandiVibe — 3D WebGL Brand Experience

Interactive WebGL-based website designed for high-engagement brand presentation. Combines motion, depth, and UI to increase retention and perceived value.

Stack: WebGL · Three.js · JavaScript · Interactive UI systems

CORE STACK

Search & Organic Growth — Technical SEO · On-page & entity optimization · AEO (Answer Engine Optimization) · GEO (Generative Engine Optimization) · Keyword strategy (commercial intent focus) · SERP analysis · Topical authority building · Internal linking systems · Local SEO (GMB) · Content architecture · Competitor gap analysis · Search Console · Ahrefs · Semrush

AI Systems & Automation — AI prompt engineering (production-level) · AI content pipelines (SEO + landing systems) · n8n workflow automation · LLM-driven classification & enrichment · Automated lead generation systems · Process orchestration across marketing funnels

Engineering & Data Pipelines — Python (Flask · FastAPI · Playwright · BeautifulSoup · APScheduler) · JavaScript / Node.js · Chrome Extension development · REST API design · Web scraping at scale · Data pipelines (structured extraction → storage → output) · SQLite

Web & Conversion Infrastructure — WordPress (Elementor, performance optimization) · Shopify (Liquid · Dawn customization) · Odoo · Conversion-focused landing systems · Page speed & UX optimization

Analytics & Growth Optimization — GA4 · Google Search Console · Looker Studio · SQL · Funnel tracking · Conversion analysis · Attribution modeling · A/B testing frameworks

PROFESSIONAL EXPERIENCE

Senior SEO & Digital Marketing Specialist — Innohedge Jan 2025 – Present

Built and operationalized AI-driven marketing systems across SEO and content workflows. Developed automated content pipelines, prompt frameworks, and data-enriched keyword systems to scale organic acquisition. Implemented n8n-based automation for lead flow, content distribution, and reporting. Applied AEO and GEO strategies to capture emerging AI-driven search visibility. Focused on reducing manual execution by replacing fragmented tools with integrated, systemized growth infrastructure.

Senior SEO & Digital Marketing Specialist — Print Britannia May 2021 – Mar 2025 · 3 yrs 10 mos

Architected the SEO and content ecosystem that ranked high-value commercial keywords and converted organic traffic into revenue. Built structured keyword clusters, internal linking systems, and conversion-focused landing flows. Optimized site performance and search visibility using data-driven analysis tied directly to revenue KPIs.

SEO & Digital Marketing Specialist — Image Retouching Lab Jan 2019 – May 2021 · 2 yrs 4 mos

Led digital marketing execution across SEO, content, and social channels. Managed team operations, campaign rollout, and engagement strategy. Improved brand visibility and client acquisition through structured content and search optimization.

Independent Consultant — Upwork Jul 2023 – Present

Delivers SEO systems, AI-driven content infrastructure, and custom automation solutions for global clients. Builds integrated workflows combining search strategy, data pipelines, and web execution — replacing the need for multiple vendors with a single, unified system.

Hire a marketer, you get campaigns.

Hire a developer, you get features.

Hire me, you get the full system — the campaign, the tool that runs it, the data pipeline behind it, and the storefront it sells on.

One hire. One brain. No vendor chain.

Portfolio, live product demos, and code samples available on request.
